SUMMARY

Forward deployed engineer who takes LLM systems from a vague business problem to something running in production, then measures whether it actually works. I run the discovery, scope the build around a number the client already cares about, ship it on Python, TypeScript, Next.js, and Supabase with the Claude API, and write the runbooks so the team can operate it after I leave. Recent public work: an open-source RAG retrieval evaluation harness and an MCP server exposing those evaluations as agent tools. 25+ systems deployed across healthcare, real estate, legal, e-commerce, nonprofit, and media. Before engineering, a decade in finance and operations, MBA in Finance and fractional CFO to a major Atlanta technology conference, so I hold my own with executives and push back on scope that will not produce a result.

TECHNICAL SKILLS

AI & Agents: Claude / Anthropic API, Claude Code, LLM Workflows, AI Agents, Multi-Agent Orchestration, Model Context Protocol (MCP), Prompt & Context Engineering, RAG, Retrieval Benchmarking (BM25, TF-IDF, dense, hybrid), AI Evaluation / LLM-as-Judge, Observability

Stack: Python, JavaScript, TypeScript, SQL, Next.js, React, Node.js, Supabase, PostgreSQL, REST APIs

Platforms: Git, GitHub, Vercel, Cloudflare, Cloudflare Workers AI, Zapier, n8n, WordPress, Google Apps Script

Delivery: Client Discovery, Workflow Mapping, Requirements Gathering, Solution Architecture, Executive Communication, Non-Technical Team Training, Runbooks & Technical Documentation, ROI Scoping

Certifications: AI Fluency (Anthropic); Claude 101 (Anthropic)

PROFESSIONAL EXPERIENCE

AI Implementation Consultant | Intellovate AI Inc

Atlanta, GA | Dec 2025–Present

- **Retrieval quality is unmeasurable by vibes.** Built and open-sourced a RAG evaluation harness scoring BM25, TF-IDF, dense, and hybrid retrieval on recall, precision, MRR, and nDCG, plus an MCP server exposing 5 evaluations as agent tools with an LLM-as-judge for faithfulness and correctness. Dense scored 0.957 nDCG vs 0.829 hybrid and 0.789 BM25, and the judge showed faithfulness and correctness diverging exactly at retrieval failure, not generation failure.
- **Clinics lose scheduling data when the internet drops.** Architected a multi-clinic practice-management system on Next.js, Expo, Supabase, and WatermelonDB with offline-first sync: 71,600 lines, 9 modules, 42 tables, 22 edge functions, 3 languages, designed to save a projected 2,000+ administrative hours a year.
- **Front desks cannot answer messages at night, in two languages.** Shipped a bilingual WhatsApp booking agent for a wellness studio on the Meta Cloud API and Claude; it ran unattended in production and handled all 67 inbound messages from 17 customers with no human in the loop.
- **Support queues need routing, not just replies.** Built a WhatsApp customer-service agent with an operations dashboard, queue routing, two-pass escalation, sentiment and urgency analytics, and 5-dimension conversation quality scoring so failures surface before customers report them.
- **Solo operators run their business across six disconnected tools.** Delivered multi-tenant operations platforms, internal tools, and analytics dashboards, including a law-firm OS unifying intake, time and invoicing with Stripe, a deadline engine, and questionnaire-to-document generation.
- 25+ systems deployed and running across healthcare, wellness, real estate, legal, nonprofit, e-commerce, and creator clients on Vercel, Cloudflare, and Hostinger.
- Run discovery end to end: map how a team actually works, translate vague operational problems into technical requirements and architecture, then write runbooks, train non-technical users, and hand off systems teams run on their own.

Founder & Fractional CFO / Financial Consultant | Karaya Consulting LLC

Atlanta, GA | 2018–2025

- Served as fractional CFO for Render Atlanta (RenderATL), a major Atlanta technology conference, from 2021 to 2023: owned GAAP financial reporting, budgeting, and cash-flow planning, sat on the senior leadership team, and helped drive 300% gross revenue growth by advising leadership on pricing, sponsorship economics, vendor spend, and operational strategy, including securing \$100K in low-interest financing.
- Embedded with founders and operators as an outside CFO and advisor, translating client goals into practical business systems and delivering websites, automation, ad campaigns, investor pitch decks, and digital assets.
- Helped clients secure \$3M+ in bank financing and supported two e-commerce and SaaS acquisitions totaling roughly \$2.5M through financial analysis, documentation, and lender-facing materials.

Founder & Chief Experience Officer | Finance With Phil Inc, 501(c)(3)

Atlanta, GA | 2020–Present

- Founded and scaled a financial-literacy nonprofit: 100+ workshops delivered and content reaching 11M+ views, building the habit of explaining technical material to non-technical audiences.
- Built the org's digital infrastructure: website, analytics dashboard, automated grant pipeline, and online learning community.

Investment Manager | Karaya Capital Management

Atlanta, GA | 2019–Present

- Evaluate residential development, value-add real estate, and private fund opportunities, and own investor communications, turning deal performance, risks, and timelines into clear stakeholder reporting.

Graduate Teaching Assistant | Georgia State University

Atlanta, GA | 2019–2021

- Taught Business Analysis (MGS 3100) to 300+ undergraduates, raising average exam performance from below 40% to above 80% by redesigning lessons around hands-on projects and real-world cases.
- Built lesson plans and engagement tools reinforcing business process thinking, data analysis, and applied decision-making.

LEADERSHIP & COMMUNITY

Chapter President | US-Africa Chamber of Commerce, Atlanta Chapter | 2021–Present

- Lead chapter initiatives across entrepreneurship, business development, and economic opportunity, and designed a free credential-based AI apprenticeship that places an early-career builder on real client work.

Mentor & Program Lead, College Immersion / RISE | Finance With Phil Inc with Leaks Leadership Foundation | 12+ Years

- Mentored students through college readiness, financial literacy, and career exposure, hosted college tours across Georgia, Alabama, and Florida, and led RISE at Maynard Jackson High School for roughly five years.

Boards & Affiliations: Empire Board of Realtist · Atlanta Friendship Initiative · National Black MBA Association

EDUCATION

Master of Business Administration, Finance | Georgia State University | Conferred January 2022

B.S. Public Health (Minor: Public Policy) | Georgia State University | May 2019
